Dayton, OH 45410

Dear Pete and Susan,

My Father recently let me know that you have expressed an interest in possibly providing family members with the opportunity to become key employees and shareholders of CDL, CML and GFS.

As you both may be aware, I have been working for the Maryland General Assembly for the past four years. It has been a great learning experience however, as I look to advance my career I feel the Government does not present me with the opportunities that CDL, CML, and/or GFS could.

Over the past year, I have been fortunate to assist my father with the launch of JMS Technology Holdings. In that short time, I played an integral role in finding our first client Jamison Hodges; designed, built and launched the [jmstechholdings.com](http://jmstechholdings.com) website, and assisted my father with the process of researching and obtaining potential new clients. In doing so, I have had the opportunity to take part in the exciting and rewarding work that makes up the intellectual property and venture capital industry.

Additionally, I am currently enrolled in a web application development program (Betamore) which is based out of Baltimore, MD. Betamore provides students and entrepreneurs with the tools necessary to develop ideas into industry leading companies. A few success stories that have been created from these educational courses include Groupon, Living Social, and Order Up.

If given the chance, I am willing to put forth whatever effort deemed necessary to become a successful contributor to the continued success of your businesses. I am open to relocating and starting from the bottom in whatever capacity required in order to truly understand the foundation of the business. I want you to know with the utmost sincerity that I would consider any opportunity to be a part of CDL, CML, and GFS an invaluable one. I would welcome the opportunity to present my capabilities in greater detail either in person or via Skype at your convenience. Thank you for your time and consideration.

Sincerely yours,

Colin B. Stodd
